

Social debate

On December 15, 2023, at the headquarters of the Specialized Support Center in Puławy, a social debate was held with the participation of seniors and people with disabilities, representatives of institutions and entities working on their behalf, as well as representatives of local authorities.

The program of the Debate included speeches by representatives of the local government and key entities in the local system of counteracting domestic violence, i.e. the Municipal Social Assistance Center in Puławy and the District Police Station in Puławy. A panel discussion was also scheduled with the participation of representatives of various entities working on behalf of the elderly and disabled in Puławy, including the Interdisciplinary Team, the Municipal Social Assistance Center in Puławy, the Municipal Commission for the Solution of Alcohol Problems, the Daily Adaptation Center in Puławy, the Puławy University of the Third Age.

The debate created a space to raise issues relevant to the quality of life and better protection from violence of the above-mentioned groups of people, better understanding of their needs. Conclusions were developed, postulates that will be forwarded to those who influence changes in local, provincial and national social policy.

It was another opportunity to show that the problems of the elderly and people with disabilities are important to us, that we want to respond to them, try to reduce and solve them.

We would like to thank all the panelists and participants of the event for their active participation, constructive conclusions and demands.
